## NOTICE

The information herein does not purport to cover all details or variations in equipment nor to provide for every possible contingency to be met in connection with installation, operation and maintenance. Should further information be desired or should particular problems arise which are not covered sufficiently for the purchaser's purposes, the matter should be referred to General Electric Company, Drive Systems Operations, 1501 Roanoke Boulevard, Salem, Virginia, USA, 24153.

## NOTICE

This document contains proprietary information of General Electric Company, USA and is furnished to its customer solely to assist that customer in the installation, testing, and/or maintenance of the equipment described. This document shall not be reproduced in whole or in part nor shall its contents be disclosed to any third party without the written approval of General Electric Company, Drive Systems Operations, 1501 Roanoke Boulevard, Salem, Virginia 24153, U.S.A.

# ENGINE/GENERATOR CONTROL PANEL

## Function

The engine/generator panel contains the control electronics required to regulate engine speed (frequency) and system voltage.

## Description

The main components of an engine/generator control panel consist of:

- Generator Circuit Breaker
- Generator Engine Control Electronics module
- CTs and PTs for transducers and metering
- Metering

The arrangement of the particular components as well as their features (e.g.; drawout circuit breaker vs stationary) varies according to system requirements.

For a description of each module or device, refer to the appropriate publication in this manual.
